3. ☐ Claims Nos.:  
because they are dependent claims and are not drafted in accordance with the second and third sentences of Rule 6.4(a).

## Box No. III Observations where unity of invention is lacking (Continuation of item 3 of first sheet)

This International Searching Authority found multiple inventions in this international application, as follows:

The crystallization index in thickness direction recited in claim 1 and the power value at given space frequency in width direction recited in claim 3 cannot be stated as being identical technical matters judging from the contents thereof. Consequently, from these matters, it does not appear that claims 1 and 3 are in a relationship sharing novel technical feature. Further, it also does not appear that these matters are those having been recognized as having close relationship by persons skilled in the art to which the invention pertains in the field of biaxially oriented polyester at the time of filing of this application. Therefore, these inventions are not in relationship (continued to extra sheet)
